

Construction of upgrades and improvements to the City of Hackensack’s storm and sanitary sewers under Clay Street Combined Sewer Separation Contract 1: Park St to Main St (NJWB No. S340923-13) in Hackensack, NJ, in the amount of approximately \$5.9M were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by reducing combined sewer overflows and alleviating sewer surcharge for residents and businesses in the City of Hackensack’s combined sewer service area.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
